JOGMEC and GNS Science held the third GNS Science - JOGMEC workshop, ~Assessment Technique for Occurrence of Acid Fluids~

Japan Oil, Gas and Metals National Corporation (JOGMEC) is pleased to announce that JOGMEC and GNS Science International Limited (GNS) held the third GNS Science - JOGMEC workshop on December 10th, 2018.

JOGMEC and GNS held the third workshop on December 10th, 2018 focusing on assessment technique for occurrence of acid fluids in geothermal system.

The cooperation between JOGMEC and GNS dates back to 2015 when JOGMEC and GNS signed MOU for bilateral cooperation in the geothermal field. Since then, under the MOU, JOGMEC and GNS have been working together to promote geothermal development. This is the third workshop JOGMEC and GNS held together.

Acid fluids in geothermal system are recognized as obstacles in geothermal development as they damage materials and facilities. On this occasion, we invited distinguished experts of this field from related Japanese companies, universities and GNS. During the workshop, the lecturers gave insightful ideas and opinions about acid fluids regarding its chemistry, origin and such. The participants raised several questions regarding the lectures, making the workshop very constructive.

JOGMEC continues to collect and provide useful information such as the latest trend of technology in geothermal resource developments for further geothermal resource developments

Lecture from GNS
