On September 30, 2021, JOGMEC opened the English version of new website "CLEAN FUTURE ENERGY" in order to introduce the new strategy and activities including "Carbon Capture and Storage," "Clean Hydrogen and Ammonia" and "Digital Technology."

This website showcases JOGMEC's activities, which aim towards carbon neutral society, as well as enhancing the competitiveness of Japanese companies through the application of cutting-edge technologies. The name "CLEAN FUTURE ENERGY" comes from JOGMEC's ambition to contribute to the stable energy supply in an environmentally friendly manner.
